

▶ Polycom® HDX™ 9000 Series

Premier Video Conferencing
Systems for High Impact
Visual Experiences

The ultimate high-definition integrator's codec,
designed to be the heart of a customer's telepresence solution.

Raising the bar for performance and flexibility, Polycom HDX 9000 Series video conferencing systems deliver high-definition collaboration experiences to conference rooms, lecture theatres, executive suites and more.

High-Performance Architectures Radically Boost Visual Communication

Polycom HDX 9000 Series systems powerfully and seamlessly integrate with rich-media tools to enhance any presentation or meeting environment. Through integration of Polycom HDX 9000 Series systems' powerful set of APIs and abundant video and audio connectors, customers can create and customise conferencing solutions for simple to advanced applications, including auditoriums utilising multiple cameras, projectors and displays, executive boardrooms with touch-panel displays, recessed lighting and individual participant monitors and training facilities with high-definition lecture recording systems and HD document cameras. Polycom HDX 9000 Series systems also offer greater conferencing flexibility with the optional embedded multipoint feature, which allows multiple sites to be brought online quickly and easily.

High-Quality, Natural Interaction

Life-like conference audio for Polycom HDX 9000 Series systems environments is driven by Polycom Siren 22 and Polycom StereoSurround technologies, enabling attendees to hear remote participants' voices in stereo through left and right dual-mode speakers within a single microphone array. Polycom HDX 9000 Series systems are powerful enough to discern the subtlest of sounds and transmit them to others in the conference, enabling clearer and less ambiguous communications and more efficient meetings.
